

Sowrabh Bidarkar

Data Analyst

✉ bidarkarsowrabh@gmail.com [in linkedin.com/in/sowrabh-bidarkar](https://www.linkedin.com/in/sowrabh-bidarkar)

Summary

Data Analyst with strong foundation in SQL, Python, Excel, and Power BI. Skilled in data cleaning, analysis, and dashboard development to generate insights and drive data-driven decision-making. 6 months of hands-on internship experience with proven impact, including streamlining reporting workflows and reducing manual effort by 30%.

Skills

Programming: Python, SQL

Databases: PostgreSQL, MySQL

Data Analysis: Exploratory Data Analysis, Data Cleaning, Data Validation, Feature Engineering, Statistical Analysis

Data Engineering: Classification, Logistic Regression, Decision Trees, Random Forest, K-Means Clustering, SHAP Explainability

Business Intelligence: Power BI, Tableau, Dashboard Development, KPI Tracking, Data Visualization

Excel and Reporting: Advanced Excel, Pivot Tables, VLOOKUP, XLOOKUP, Power Query, Conditional Formatting, Dashboard Reporting

Experience

Data Analyst Intern

Elixir AI (Remote)

Apr 2025 – Sep 2025

Tools Used: Excel, PostgreSQL, Power BI

- Analyzed 2,000+ records of multi-source operational data from 20 datasets using SQL and Python to identify process inefficiencies, uncover operational bottlenecks, and support data-driven decision-making.
- Developed optimized SQL queries (joins, aggregations, and subqueries) to extract, clean, and transform large datasets for analytical reporting and business insights.
- Designed interactive Power BI dashboards tracking 25+ business KPIs including revenue, user registrations, and operational performance metrics.
- Optimized data preprocessing and reporting workflows using Python (Pandas), reducing manual reporting effort by 30%.
- Consolidated multi-source healthcare datasets into analytics-ready repositories and developed MIS reporting solutions, improving reporting accuracy while delivering actionable insights to business stakeholders.

Projects

AI-Powered Customer Churn Intelligence System | Python, SQL, Machine Learning, SHAP, Power BI

- Built a customer churn prediction system using Python, SQL, and Machine Learning to identify customers at risk of churn across 7,000+ telecom customer records.
- Performed data cleaning, exploratory data analysis (EDA), feature engineering, and customer segmentation to prepare customer data for predictive analysis.
- Trained and compared Logistic Regression, Decision Tree, and Random Forest models using Accuracy, Precision, Recall, F1-score, and ROC-AUC metrics.
- Applied SHAP Explainable AI to interpret model predictions and identify key churn drivers, and developed a Power BI dashboard for customer risk analysis and business insights.

Consumer Behavior Analytics Project | Python, SQL, Power BI

- Processed and examined 3,900+ retail transactions using Python and SQL to identify customer purchasing behavior, conversion trends, and revenue drivers.
- Performed feature engineering across 15+ variables improving dataset readiness for analysis.
- Built predictive models including Linear Regression, Random Forest, and Artificial Neural Networks.
- Executed RFM analysis and K-Means clustering to segment customers into 5 behavioral groups.
- Built an interactive Power BI dashboard with 12+ visualizations and 10+ KPIs to monitor sales trends and product performance.

Education

MBA - Business Analyst

ITM Business School, Navi Mumbai

Graduated: 2026

CGPA: 8.64 / 10

Bachelor of Technology - Computer Science Engineering

CMR Institute Of Technology, Hyderabad

Graduated: 2023

CGPA: 8.37 / 10

Certifications

- Data Visualization with Python - IBM
- Databases and SQL for Data Science with Python - IBM
- Preparing Data for Analysis with Microsoft Excel - Microsoft
- Data Analysis and Visualization with Power BI - Microsoft
- Java Programming Fundamentals - Infosys
- Database Management System - Infosys
